## PIPENET VISION Process & Power Industry Presentation Powerpoint

Dear user,

You now have the chance to download and view the latest PIPENET VISION Presentation Powerpoint. PIPENET VISION Software Modules are being widely used by international EPC and Plant Owner/Operator companies for rapid flow analysis in PIPE and DUCT networks. Three Software Modules ensure that, no matter how extensive or complex your network, PIPENET VISION will perform.

To view and download the latest **PIPENET VISION Process & Power Industry Presentation Powerpoint**, you need to use the following URL: <http://www.box.net/shared/fvubp1813i> . You will then be asked for a password. Please use the following password: **PNPPT18JUNE2009P**

This presentation is aimed at raising the profile of using PIPENET VISION Transient Module in the minds of Managers, Operators, Plant owners, Designers and Installers. Why using Transient Module? Why don't engineers undertake surge analysis? type of damages that arise from Surge events [catastrophic failure to pipeline and equipment and fatigue damages to pipelines, equipments and support] and damages due to Water/Steam Hammer in Power industry with photos from customers are included. Also, project examples such as complex Firewater Systems within Refineries, Offshore Platforms, Airport Hangar Firewater System and Deluge System and Plant Cooling Water Systems have been demonstrated using Spray/Sprinkler and Standard Software Modules.

If by any reasons you're unable to download the presentation, please contact us through our web site <http://www.aai-software.com/pipenet.html> or call our office in order to send you the above mentioned powerpoint CD.
