

RxViewServer version R9.0 is now released!

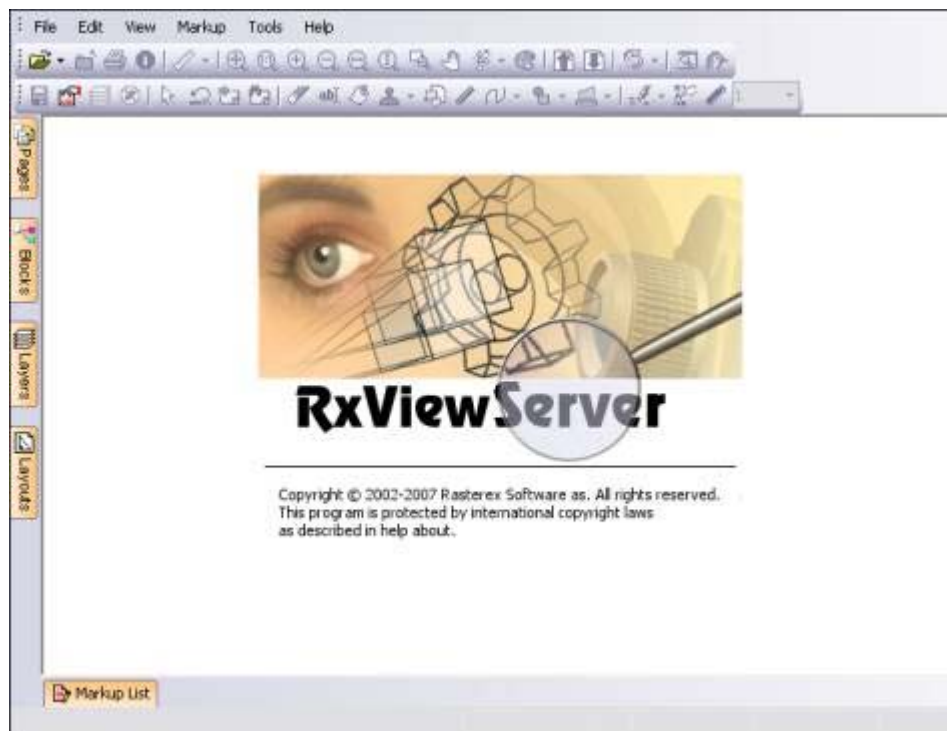

**World's best Raster to Vector Conversion
Software Package is now even better!
RxAutoImage version R9.0 is now released!**

**As ARSHIVAN's & AlphaKaran's Technology
Partner, now we provide Integrated
Technical Document Management & Project
Document Management Solutions**

"Ask us about our Multi-License Key Clients"

The image is an advertisement for AAI. It features a 3D rendering of two metal coils of wire on a grey surface. One coil is upright, and the other is lying on its side. A thin wire connects the two coils. In the top right corner, the website URL "www.aai.ir" is displayed in a white, sans-serif font. Below the URL, there is a red horizontal line. At the bottom of the advertisement, the following contact information is listed in a white, sans-serif font:

No. 59 , Modares Expressway , Tehran 15889 .
Tel : +98(21) 88 82 11 09
88 30 16 30

RxViewServer is a server-based solution for fast sharing of documents and drawings over the web – with no software installed on the client machines! **RxViewServer** allows users to view, print, markup and collaborate on more than 250 different file formats (CAD drawings, plot-files, PDF files, Office documents, raster images etc.) directly within their browser – via intranet, extranet, internet, web portals or content management systems.

- Comprehensive CAD and Office viewer suite
- AutoCAD 2008 DWG, DXF, DWF support and more
- MS Office 2007 XML support
- SolidWorks 2007 support
- Strong improvement on 3D CAD viewer functionality
- Major viewer update with new features and enhancements

Rasterex releases RxAutoImage R8.2

Rasterex Software announces the new release of their software for raster editing and raster to vector conversion, with support for AutoCAD 2008 and Windows Vista. Download free trial version for evaluation.

This release covers all versions of AutoCAD from 2000 to 2008 and AutoCAD LT from 2002 to 2007. It can also be used with other Autodesk products, like Mechanical Desktop, Architectural Desktop and AutoCAD Map.

Rasterex has for more than 10 years been the leading supplier of sophisticated software for incorporation of scanned drawings into CAD environments. The product family is divided into two global branches – [RxAutoImage for AutoCAD](#) and RxSpotlight for Windows.

RxAutoImage is an ARX application that works directly inside AutoCAD. It converts scanned drawings to vector information, and turns AutoCAD into a true CAD and GIS hybrid editor. It combines the power of AutoCAD, intelligent raster editing technology, raster-to-vector and vector-to-raster conversions.

New benefits in version R8.2:

- AutoCAD 2008 support!
- Works with all AutoCAD 2008 products (except from AutoCAD LT, which stops on v 2007)
- Works also with all earlier versions of AutoCAD, back to AutoCAD2000
- Fully Windows Vista compatible

R8.2 is a service release:

RxAutoImage is updated every year, few months after each release of AutoCAD. All customers under maintenance contract will automatically get the new release

for free. New customers can download a free trial copy for evaluation here.

RxView & RxHighlight R9.0 Windows viewer for CAD and Office files released

Rasterex Software, a global leader in CAD and Office viewer technology, has released version R9.0 of their popular family of viewer products for Windows. Download free evaluation trial version.

RxView allows users to view & print more than 250 different file formats (2D & 3D CAD, plot-files, PDF files, Office documents, raster images etc.) - without the design software installed on the machine.

RxHighlight is the same application, but adds advanced functions like redlining and markup, file conversion and text search & extraction, for collaboration between team members.

"Updating the AutoCAD filter to latest version is always important for our customers" says Per Christian Lindstad, CEO at Rasterex Software, "but even more important in version 9.0 is the support for the new XML format in MS Office 2007 and the strong improvements of the 3D model inspection".

Customers under SSA contract have already received the new version. New users can download and try the software for free on [Rasterex download page](#).

Updated format support:

- AutoCAD 2008 support
- SolidWorks 2007 support
- MS Office 2007 support - MS Word, MS Excel, MS PowerPoint and RTF

New agreement with Datakit improves 3D support:

- Rasterex has signed an agreement with Datakit, a leading vendor within 3D translators, for use of their 3D technology for viewing and inspection of 3D models within Rasterex viewers
- The agreement with Datakit provides support the high end formats. Parts and assembly. CATIA V5, CATIA V4, Unigraphics, PRO/E and JT
- The mid range formats; Inventor, SolidWorks and Solid Edge, are supported by Rasterex directly, but are now removed from the standard product, and have instead become a part of the optional 3D readers
- All the 3D readers can simply be added to the standard RxView & RxHighlight, but are subject to individual licensing and pricing
